

This program demonstrates features of the List class, and its derivatives Stack and Queue classes. It generates stub reports showing various constructors and methods.

INCLUDE **List, Stack, Queue** headers

int **main()**

INIT tList as test List

INIT tStack as test Stack

INIT tQueue as test Queue

// these generate a text file reports

CALL **tList.GenListReport()**

// generates unordered and ordered reports

CALL **tStack.GenStackReport()**

CALL **tQueue.GenQueueReport()**

end main function
